Tag C

Please affix the garage tag to the garage door according to the guidance below, one for each, otherwise there may be detection failures.

- Use double-sided tape to affix the tags. **DO NOT** cover the surface of the tags, including the white edge of the tags, with any tape, even transparent tape.
- Select the nearest available location to the camera in the left, center, and right area of the garage door.
- Make sure the garage door area is clean and free of interference that may be misidentified as garage tag.
- Affix the tag in the top area of the garage door flat and without tilt.
- **DO NOT** affix the tag on the glass, and keep a distance more than 20 inches between the edge of the tag and the glass.
